Project Name	FinRelief AI – AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	To develop an AI-powered financial recovery platform that helps borrowers analyze their financial health, estimate loan settlement amounts, generate personalized negotiation strategies, and improve debt management using Artificial Intelligence.
Scope	The project analyzes users financial information, loan details, repayment history, and debt status to provide personalized financial health analysis, settlement predictions, AI-generated negotiation letters, loan tracking, and financial reports through an interactive web application.
Problem Statement	
Description	Many borrowers struggle to understand their financial health, calculate loan settlement amounts, negotiate effectively with lenders, and make informed financial decisions due to limited financial knowledge and lack of personalized guidance.
Impact	Solving this problem enables borrowers to reduce financial stress, improve debt repayment planning, increase settlement success rates, make better financial decisions, and achieve long-term financial stability.
Proposed Solution	
Approach	Develop a web-based application using FastAPI, React, Google Gemini AI, SQLite, and SQLAlchemy to analyze financial data, predict loan settlement amounts, generate AI-powered negotiation letters, and provide personalized financial recovery recommendations.
Key Features	• Secure User Authentication (JWT) • Loan Management System • AI-Powered Financial Health Analysis • Loan Settlement Prediction • AI Negotiation Letter Generator using Google Gemini AI • Interactive Dashboard & Financial Reports • Loan History Management

	• Personalized Financial Recommendations

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Intel Core i5 Processor
Memory	RAM specifications	8 GB
Storage	Disk space for database, application files, and logs	256 GB SSD
Software		
Frameworks	Python frameworks	FastAPI, React, Vite
Libraries	Additional libraries	SQLAlchemy, Pydantic, Google Gemini API, JWT Authentication, Requests, Passlib, Unicorn
Development Environment	IDE	Visual Studio Code
Data		
Data	Source, size, format	User-provided financial information, loan details, repayment history, SQLite database (finrelief.db), JSON files for reports and logs
